

Áron László Kovács

Software Engineer

Education:

Eötvös Loránd University

2020-2023

Bachelor of Science in Computer Science.

Óbuda University

2007-2013

Bachelor of Science in Project Management.

Profile:

I got to meet software development during my work. I liked their daily routine and I thought I could do this too. So I delved into the mysteries of this profession, got acquainted with several programming languages and currently work as a frontend heavy software engineer. During my work, I mainly deal with the client-side logic of web applications, I keep in touch with backend developers, project managers/owners, testers and analysts. I completed the Computer Science at Eötvös Loránd University while working full time.

Hobbies:

Spending time with my wife, petting my pet rabbits (if they allow), reading, jogging, travelling, meeting new people, crossfit, coding, beer (I am a beer guy)

Expectations:

I like to be part of a team where I can expand my professional knowledge with new experienced people, even delve into other programming languages, technologies.
